04.ROADMAP

INTRODUCTION

- TANZANITE purpose is to allow anyone to be able to own a stake in the global Stocks by just purchasing TANZANITE TOKEN
- TANZANITE TOKEN is built under Binance Smart Chain, this is because the chain is simple, fast and has very low gas fees.

ABSTRACT

- The success of DeFi applications has been remarkable since their introduction and although being limited at first their growth has accelerated to catapult the industry surrounding financial disintermediation to a mult-billion dollar behemoth.
- To replace the current financial system's core institutions, decentralized apps have become increasingly sophisticated and effecient terms of lending and borrowing mechanisms, risk management and formation of on-chain liquidities. The rate at which inventions occur has never been faster and it is exponentially growing faster.

ABSTRACT

TANZANITE TOKEN HAS LAUNCHED IN DECEMBER 2022. With a total amount of minted tokens being 100,000,000 TZN. This is the final amount of the tokens minted the total supply of the TANZANITE tokens will never exceed this initial minted amount that is why our smart contract does not allow minting of the tokens. All TANZANITE tokens are being held by the TANZANIA WALLSTREET company and it is the legal body which sells the tokens and after the exchange the money is used in investing in stocks and in operation of the project.

MISSION

TANZANITE 'S major goal is to help people invest in global stocks in an easy, better and safer way hence investing globally but locally

VISION

- TANZANITE is motivated by a strong desire to help others and we are looking forward to the positive behavior from our community which sets us apart.
- Positive or negative critism is vital so long as we learn something from the interaction we get everyday from the community

TOKEN OVERVIEW

TOKENOMICS

TANZANITE TOKEN has been built with the idea of creating long term value. The token itself is a proof of stake token built under the Binance Smart Chain

TOKEN UTILITY

- Holding the TANZANITE token grants you some percentage of the token depending on the amount of the token that you have staked, this is given as a reward to all the holders of the token.
- All the holders of the token get the ability to participate in voting on the TANZANITE DAO
- Holders of the token can also become merchants and offer P2P trading of the token.
- All holders of the token will get access to all the services that will be introduced later.

DISTRIBUTION OF THE TOKEN

CATEGORY	PERCENT	AMOUNT
SEED SALE	8%	8,000,000
PRIVATE SALE	12%	12,000,000
TEAM	10%	10,000,000
RESERVES	16%	16,000,000
MARKETING	10%	10,000,000
AIRDROP	2%	2,000,000
LIQUIDITY&LIQUIDIT Y MINING	15%	15,000,000
FARMING POOL	27%	27,000,000
TOTAL	100%	100,000,000

ECOSYSTEM

- Automated market Maker (AMM) is one among the most important parts of the DeFi ecosystem allowing digital assets to be traded in an automatic way without permission by using liquidity pools rather than a traditional market of buyers and sellers.
- Users can trade TANZANITE token on differtent decentralized exchanges like PancakeSwap and many others by just using our token smart contract address
- Users will also be able to trade the token on centralized exchanges of which later the token will be listed on.

LIQUIDITY LOCKERS

- In the DeFi area liquidity locker has become very crusial, this is make sure the project is trustworth and live therefore no investor would like to invest in rugs where one becomes unable to sell or trade back the token.
- Hence we will lock some of our tokens in liquidity lockers for longer period of time of upto 5 to 10 years.

FARMING

Any cryptocurrency or token must establish market depth and stimulate liquidity. Farming feature provides project developers a method to reward their community by setting up a vault hence all the users providing liquidity through farming that is joining our farming vault will be rewarded with free TANZANITE TOKENS.

ROADMAP

Q1 2023	Q2 2024	Q3 2025
Idea formation	Seed sale round	ICO
Team formation	Private sale Round	Listing on Centralized exchange
Creating GITHUB organization	Smart Contract Address audit	Seeking for partners
Releasing Airdrops	Marketing Strategy	Purchasing stocks
